EDUCATION

**B.Tech, Artificial Intelligence And
Data Science Engineering AI & DS**

St. Martin's Engineering College

CGPA: 8.02 2022-2026

Intermediate

Narayana Jr College

86.1% 2020-2022

SSC

Narayana High School

CGPA: 10.0 2020

SKILLS

- **Programming Languages:** Python, Java
- **AI/ML Libraries:** TensorFlow, Keras, PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Sentence Transformers
- **Web Technologies:** HTML, Tailwind CSS, React, Node.js, RESTful APIs
- **Game Development:** Unity, Godot, Pygame
- **Tools:** Git, GitHub, Docker, Qoder, Copilot, Render, Vercel, Netlify, FAISS, Groq API
- **Other:** Machine Learning, Data Analyst, Vibe Coder

LANGUAGES

- ENGLISH (Proficient)
- TELUGU (Native)
- HINDI (Proficient)

SUMMARY

Aspiring AI and Data Science Engineer pursuing a B.Tech in Artificial Intelligence and Data Science, with a robust foundation in programming languages such as Python, C, and Java. Skilled in game development, having built interactive applications using Unity, Godot, and the Pygame module. Previously worked as a Vibe Coder at Hopscotch Games, where I combined creativity and technical expertise to design engaging interactive experiences. Demonstrates a unique blend of innovation and analytical thinking, applying AI concepts to practical projects. Passionate about leveraging these skills to solve complex problems and create cutting-edge solutions in the fields of AI and Data Science.

WORK EXPERIENCE

Game Developer

Akiyam Solutions - Remote

May. 01, 2026 - Present

- I am working on VR level design.

Broadbased Games - Remote

July. 29, 2025 - June.12,2026

- I have worked on the central bureau isometric mapping.
- Created the isometric assets for the Central bureau map.

Vibe Coder

Hopscotch Games - Remote

SEP. 22, 2025 - OCT 6, 2025

- Designed and implemented AI-driven workflows using ChatGPT for the automated generation of game assets and narrative content, significantly speeding up the development pipeline.
- Leveraged AI tools to prototype and develop interactive game mechanics, including the "Petrograd Political Simulator" and "Mystery Time."
- Used Claude and other AI models to build some fun interactive games and AI apps.

Machine learning intern

Genz Educate Wing - Remote

Jan. 10, 2025 - March 10, 2025

- Credit Card Fraud Detection - Built a Random Forest model to detect fraudulent transactions in an imbalanced dataset; applied SMOTE and cross-validation to ensure robustness, achieving ~99% test accuracy.

Qskill - Remote

Jan. 10, 2026 - Feb 10,2026

- Classifying iris flowers into three species (Setosa, Versicolor, Virginica) based on measurements of their petals and sepals.

PROJECTS

GAME PROJECTS

Shadow Avenger (Godot)

- Created a modern 2d alien invader game targeting both PC and Android platforms, focusing on shadow mode as the core mechanics. Link: <https://play.google.com/store/apps/details?id=com.Aj.ShadowAvenger>

Slime Race (Godot) – GMTK Game Jam 2025

- Developed a 2D racing game where players control a slime competing to finish 3 laps while being chased by knights.
- Implemented AI behavior for competitor slimes and chase mechanics for pursuing knights.
- Collaborated within the 48-hour jam deadline to deliver a complete, polished prototype.
- Link: <https://aji-creators.itch.io/slime-race>

Swim_bomber(Godot) – TOY BOX Jam 2025

- Developed a 2D Bomber man game with puzzle to find 7 keys.
- Introduced swimming in water mechanic for travelling the map.
- Link: <https://aji-creators.itch.io/swim-bomber>

Dino Run(Godot)

- Developed a fun birthday game of a endless runner for my cousin.
- The game consists of a dino that collects the “happy birthday” letters with obstacles.
- After collecting all letters we get a surprise birthday video.

Space Shooter (Unity, C#)

- Created a space shooter game Prototype targeting mobile focusing on smooth gameplay and engaging mechanics.

IN DEVELOPMENT

Reload or Rot

- I am developing a top down zombie shooting game targeting both windows and android platforms.

Cross-Platform Auto Deployment Agent

- Developed an intelligent deployment agent using Ollama to automate the entire hosting process for various web projects.
- Engineered the agent to automatically scan directories, detect project types (e.g., React, Node.js, Flask), select the optimal hosting platform, and deploy using platform-specific CLIs.

OPEN-SOURCE CONTRIBUTIONS

Universal-LPC-Spritesheet-Character-Generator– Fork Maintainer

- Added lazy loading and made the website respond faster

CERTIFICATIONS

- How to Build Predicting Models - Niltech Edu
- Learnt Java & Its Industry application - Path Creators
- Artificial Intelligence & Data Science - GenZ Educatewing
- Hack-AI-Thon – Hack2Skill (Participation) – 2024
